Dear Mr. Holman,

When I called at the Treasury a few days ago hoping to meet you, it was with the object of requesting some assistance, through the Government Printing office, in the publication of the Scientific Results of the Australasian Antarctic Expedition. I was sorry to find you overrun with work, but trust that your health will be benefitted by the proposed visit to Tasmania. My request - can

The Premier will be glad to receive a report from the Government Printer in this matter.

be made in writing just as well.  
To-day I am forwarding under  
separate cover a statement of  
the case.

I have had a chat with  
Mr Gullicher, the Government Printer,  
and apparently he welcomes the  
prospect of the work for such  
gives the opportunity of showing  
to the World with what-perfection  
the work is done at the Sydney  
Printing office. I have no  
hesitation in stating that  
nowhere in the world can better  
work of its kind be done than  
at the Government-Printing office  
in Sydney.

It would have been particularly  
nice to have had the whole  
of the Scientific Publications of

3

the Expedition published at the  
Sydney office but it would  
have been asking rather a lot,  
and in such bulk would be  
apt to interfere with the regular  
work.

I hope that you received safely  
some months ago an autographed  
copy of "The Home of the Blizzard".

Mr H. Ryan, M.P. of Adelaide,  
at that time visiting Sydney  
offered to deliver it personally,  
but I never heard whether you  
got the volumes. You have  
been so much engaged that  
doubtless you will have forgotten.

I am leaving for Melbourne  
in a couple of hours time
